

Acknowledgement

This special issue of *PhiN. Philologie im Netz* is the result of chosen papers of the panel "Texts with no words: The communication of speechlessness", held by Susanne Knaller, Doris Pichler, and Rita Rieger at the 21st congress of the ICLA Vienna 2016. The publication of these papers would not have been possible without the contribution of many persons. We would like to thank the contributors, without whose cooperation the present issue would not have come into being. Our thanks go also to Peter Kenny for the proofreading and to Mario Huber for the layout of the texts. We express our thanks to the University of Graz and to Land Steiermark for their financial support as well as to the magazine *PhiN* for the smooth cooperation.
